PROFESSIONAL SUMMARY

Frontend Developer with over 2 years of experience designing and building responsive, user-focused web applications using React, Next.js, TypeScript, and modern CSS frameworks. Experienced in AI-assisted development workflows (Claude Code, GitHub Copilot, AntiGravity, Cursor) to ship polished, cross-browser, performance-optimized UIs.

SKILLS

Frameworks & Libraries: React.js, Next.js, Redux, Zustand, Tailwind CSS, NextAuth.js

Programming Languages: JavaScript, TypeScript, HTML5, CSS3

AI Tools: Claude Code, Claude, AntiGravity, Cowork, Cursor, GitHub Copilot, OpenAI API, Google Gemini AI, Groq AI

Tools & Platforms: Git, GitHub, GitLab, GitHub Actions, Supabase

WORK EXPERIENCE

React Developer | Full-time

Artcode Private Limited | Mar 2025 - Present | Pune, Maharashtra

- Developed and maintained Next.js applications with a focus on server-side rendering and performance optimization.
- Leveraged AI-assisted development tools (GitHub Copilot, Claude Code) to enhance feature development and improve code quality.
- Executed advanced SEO strategies, leading to improved search rankings and increased organic traffic.
- Designed responsive, mobile-first layouts with Tailwind CSS, ensuring cross-browser compatibility.
- Collaborated with backend teams to integrate RESTful APIs, and enhanced Core Web Vitals via lazy loading, image optimization, and code splitting.

Technologies / Tools Used: Next.js, GitHub Copilot, Claude Code, TypeScript, Tailwind CSS

Frontend Developer | Full-time

Walstar Technology | Jul 2024 - Feb 2025 | Kolhapur

- Developed over 10 WordPress websites using Elementor, incorporating custom functionality and responsive designs.
- Implemented custom JavaScript and CSS to enhance interactive features beyond standard WordPress capabilities.
- Optimized website performance through caching, image compression, and minification techniques, resulting in improved load times.

Technologies / Tools Used: WordPress, Elementor, React, Tailwind CSS

PROJECTS

Venue Booking Platform

Developer

- Developed complete frontend for multi-vendor venue booking platform with separate user, admin, and vendor panels using Next.js SSR for improved SEO and faster page loads.
- Implemented AI-based image alt text generation and an AI-powered assistance feature using OpenAI API for SEO-optimized descriptions and dynamic content suggestions.
- Used Claude Code throughout development for AI-assisted coding, debugging, and code review, improving development speed and code quality.
- Integrated Google Calendar API for real-time venue availability and booking management, and Stripe for secure payments.
- Connected WordPress headless CMS via REST API for dynamic blog content, and implemented role-based auth using NextAuth.js.

Technologies / Tools Used: Next.js, TypeScript, Tailwind, Claude Code, Google Calendar API, Stripe

BugDeck — AI-Powered QA & Bug Tracking Platform

Developer

- Architected and built a full-stack QA management platform from scratch, featuring a 5-status Kanban bug board, a test-case management module (TestIt), and role-based project workspaces, used internally to track and resolve bugs across company projects.
- Integrated AI-powered bug and test-case generation (Groq/LLM), including image-based bug detection from screenshots and a project-context injection system for accurate, domain-aware AI output tailored to each project's workflows.
- Leveraged Claude Code for AI-assisted development, debugging, and architecture decisions throughout the build, improving development velocity and code quality.
- Built CSV import/export with configurable status-mapping and per-row validation, enabling bulk migration of existing bug/test data.
- Designed a dual-source analytics dashboard (Recharts) with clickable chart segments that deep-link into filtered board views, and implemented drag-and-drop Kanban (dnd-kit) with optimistic UI and Zustand state management.
- Rebuilt and stabilized the app on Next.js 15/Turbopack after resolving critical build-tooling instability, improving developer velocity and deployment reliability.

Technologies / Tools Used: Next.js 15, React, TypeScript, Supabase, Zustand, Tailwind CSS, Groq AI, dnd-kit, Claude Code

EDUCATION

D Y Patil Pratishthan's College of Engineering

B.Tech in Computer Science | 2020 - 2024 | CGPA: 8.0/10.0
